◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Signetics (Cont'd)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

		(Continued)	

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Texas Instruments (Cont'd)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Texas Instruments (Cont'd)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Toshiba America (Cont'd)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

Bold face device numbers indicate manufacturers data is provided in the IC Master on the pages noted.

MANUFACTURERS AND DISTRIBUTORS/ REPRESENTATIVES DIRECTORY

The Manufacturers and Distributors/Representatives Directory is a comprehensive telephone directory of the entire IC industry. It places at your fingertips the names and phone numbers you need to know. It includes manufacturers, international sales offices, representatives and distributors; for manufacturers with data pages, it also includes domestic sales offices, representatives and distributors. The manufacturers' listings tell you where and whom to call to obtain technical and ordering information. It enables you to ask for the right person or phone extension. It gives you the terminology understood by the individual company's switchboard operators, e.g., in some companies you should ask for sales, in others, customer service. This directory will reduce frustration and save you time.

IS THIS A BORROWED COPY?

Avoid the hassle and order your own personal two-volume set of IC MASTER. It's the surest way to simplify your IC selection efforts.

Only IC MASTER allows you to examine and compare the specifications, relative strengths, and weaknesses of all devices in serious contention for your application. And only IC MASTER brings you actual manufacturers' data sheets, allowing you to make complete and definitive device selections.

You can order IC MASTER simply by charging it to your VISA or Master Card credit card. To place your order (USA only) call now: (408) 249-6800/(516) 227-1300. To order outside the USA, see list of authorized IC MASTER distributors on page 1471 of Vol. I.

ADVERTISERS PRODUCT INDEX

This index covers those manufacturers who have included data pages in the IC Master. It shows the page and the line on that page of every device for which data is included in the Master Selection Guide. It is organized alphabetically by manufacturer and for each manufacturer, alphanumerically by device. Bold face listings lead to data on important products. This data has been supplied for you by the manufacturers.

HOW TO USE THE PRODUCT INDEX

The Product Index includes many of the same references as the Part Number Index, but in this case the listings are sorted by manufacturer.

As in the Part Number Index, the model numbers are sorted alphanumerically from **left** to **right**. Here the manufacturer's prefixes are included so that devices without alphabetic prefixes appear before those with them (i.e., 1101 would be before LM1101). Application note pages are indicated by a ¶ sign and manufacturer's product information pages by a ★ sign. The numbers preceding the dash are the page numbers, while those following the dash indicate the location of the device on the page.

When you use the IC Master to find data on a particular manufacturer's products, this index provides the fastest way to find all the information.

PRODUKTVERZEICHNIS VON HERSTELLERN MIT EIGENEN DATENBLÄTTERN

Dieses Verzeichnis enthält die Seiten- und Zeilenangabe für jedes Produkt im Master Selection Guide, für das Hersteller ausführliche Produktinformationen übermittelt haben. Es ist alphabetisch nach Herstellern geordnet und, innerhalb jedes Herstellers, alphanumerisch nach Bauteilen. Eintragungen in Fettdruck verweisen auf Datenblätter wichtiger Produkte, die direkt vom Hersteller zur Verfügung gestellt wurden.

GEBRAUCHSANLEITUNG FÜR DAS PRODUKTVERZEICHNIS

Dieses Verzeichnis enthält viele gleichlautende Informationen wie im numerischen Typenverzeichnis, jedoch erfolgt hier die Auflistung nach Herstellern.

Wie beim Typennummern-Verzeichnis erscheinen die Bauteile in alphanumerischer Reihenfolge von links nach rechts. Die Kennbuchstaben der Hersteller sind jedoch mit enthalten, so daβ Bauteile mit Buchstaben vor solchen ohne Buchstaben erscheinen (LM101 erscheint z.B. vor 1101). Die Seitennummern der Applikationsberichte sind durch ein ¶ Zeichen und Datenblätter von Herstellern durch ein ★ Zeichen angegeben. Die dem Trennstrich vorgestellten Zahlen sind die Seitenzahlen, die nachgestellten bedeuten die Zeile, in der das Bauteil auf der Seite zu finden ist.

Wenn Sie den Master benützen, um Kenndaten eines Produkts von einem bestimmten Hersteller zu finden, so geht es über dieses Verzeichnis am schnellsten.

INDEX DES PRODUITS FABRIQUES PAR LES SOCIETES AYANT PARTICIPE A LA COMPILATION DE CET OUVRAGE

Cet index indique à quelle page et à quelle ligne on a fait mention d'appareils fabriqués per les sociétés qui ont bein voulu inclure dans le Guide Général de Sélection des renseignements détaillés sur leurs produits.

Les fabricants sont énumérés par ordre alphabétique, et sous chaque nom se trouve une liste alphanumérique des produits. Les titres en caractères gras vous indiquent où trouver des renseignements sur des produits d'une certaine importance. Ces informations ont été fournies par les fabricants eux-mêmes pour votre usage personnel.

COMMENT SE SERVIR DE L'INDEX DES PRODUITS

Cet index comprend beaucoup de références apparaissant déja dans l'Index des Numéros de Pièces, il se singularise cependant par le fait que les renseignements sont donnés par fabricant.

Tout comme dans l'Index des Numéros de Pièces, les numéros de modéle sont classés alphanumériquement de gauche à droit. Dans ce cas là, les préfixes des sociétés fabricantes sont inclus de facon à ce que les produits avec préfixes alphabétiques apparaissent avant ceux qui n'en ont pas (par exemple LM101 se trouvera placé avant 1101). Pour renvoi, les numéros de page des notices d'application sont indiqués per le symbole (¶), et les numeros de page contenant les renseignements fournis par les fabricants par une étoile (★). Les chiffres qui précèdent le titre sont les numéros de page, ceux qui suivent le titre indiquent à quelle ligne il a été fait mention du produit.

Lorsque vous utilisez le Guide pour trouver des renseignements sur les produits d'un fabricant donné, cet Index représente le moyen le plus rapide pour obtenir les renseignements nécessaires.

INDICE DEL PRODUCTO DE LOS PUBLICADORES

Este indice denota la linea y página de cada componente en la Guia Maestra de Selección para fabricantes que han incluido información detallada del producto. Está organizada en orden alfabético por fabricante, y para cada fabricante la pieza aparece en orden alfabético y numérico. Las letras más marcadas los conduce a datos de productos importantes suplidos por el fabricante.

MODO DE EMPLEO DEL ÍNDICE DEL PRODUCTO

El índice del Producto incluye muchas de las mismas referencias incluidas en el Indice del Número de Pieza, pero en este caso, la lista está ordenada por fabricante.

Así como en el Indice de Número de Pieza, los números de modelos están en orden alfabético y numérico de izquierda a derecha. Los prefijos del fabricante están includíos de tal manera que las partes con prefijos alfabéticos aparecen antes que las que no lo tienen. (Por ejemplo, LM101 estaría encima de 1101). Páginas con notas de Aplicaciones están identificadas por el símbolo ¶ y las páginas de información del producto del fabricante por el símbolo ★. Los números que preceden al guión son el número de página, mientras que los que aparacen a continuación indican la ubicación de la pieza en la página.
Cuando usa la guía Maestra para encontrar datos sobre un producto en particular, este índice provee la manera más rápida de encontrar la información deseada.

広告掲載メーカー製品インデックス

このインデックスは各マスターセレクションガイドに記載されている詳細な製品情報をのせたメーカー全ての製品のページ数とそのページの行数を示しています。メーカーはＡＢＣ順に，製品はＡＢＣ順と若い数字順にのっています。太字で記載されている製品はメーカーがのせている主要機器のデーターがそこにのっていることを示しています。

使用法

製品のインデックスはパーツナンバーインデックスと同じですがここではメーカー毎に分類されています。パーツナンバーインデックス同様型番はＡＢＣ，若い数字順に左から右へ記載されています。ここではメーカーのプリフィックスがつけられており，アルファベットのプリフィックスが付いている製品がついていない製品の前になっています。（例えば**ＬＭ１０１**は**１１０１**より前に）アプリケーションノートページは　印で又メーカーの製品情報のページは★印で示してあります。ダッシュ符号の前の数字はページ数，後の数字はそのページの製品の位置を意味します。

利用者皆様が特定メーカーの製品のデータを探される場合，このインデックスが一番速く情報を提供致します。

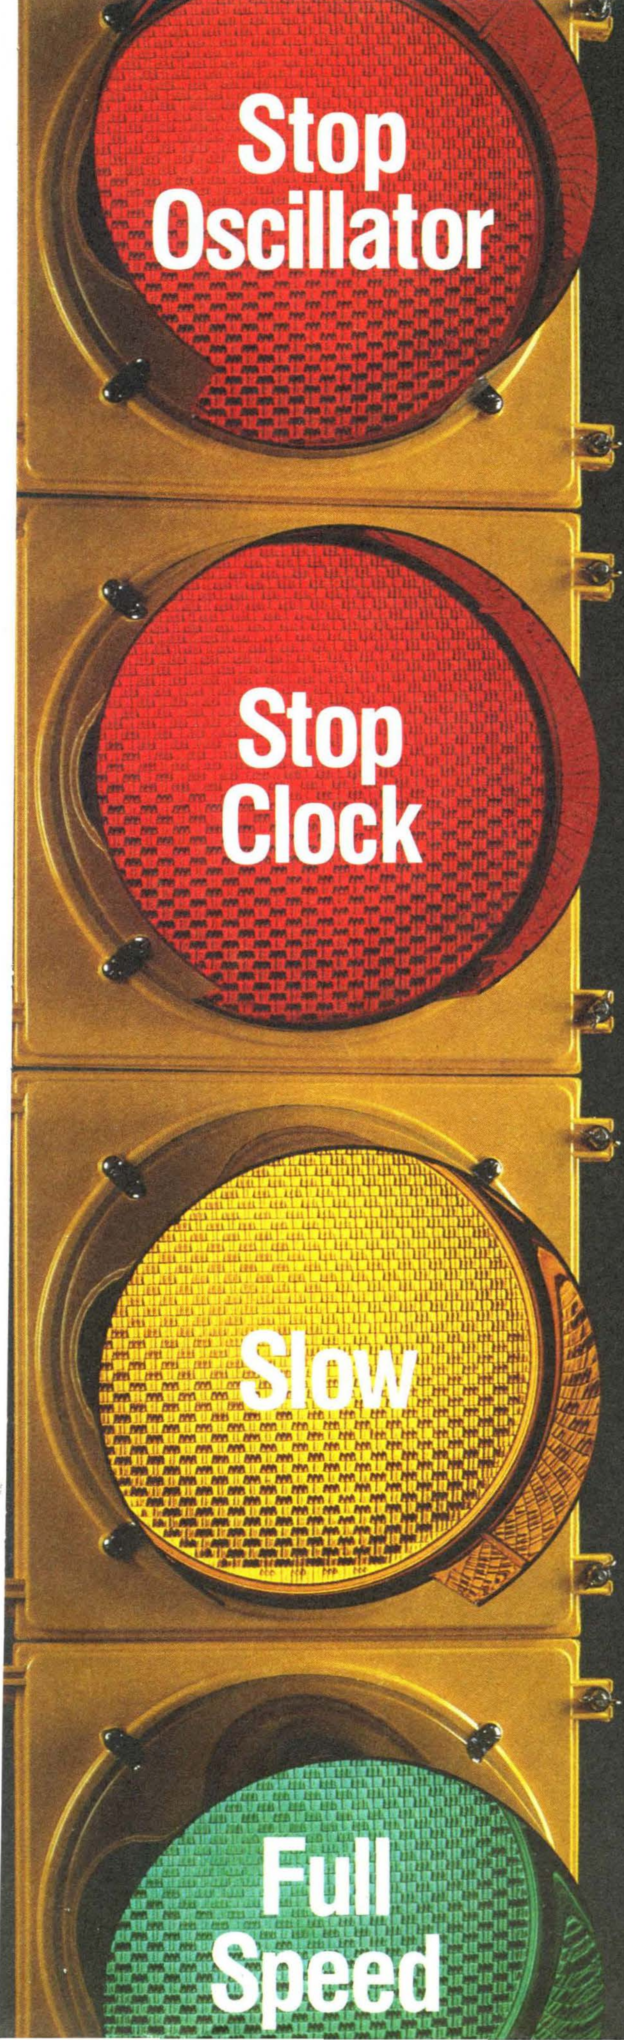
WHAT'S NEW IN IC Updates

IF YOU NEED THE IC MASTER YOU NEED THE IC UPDATES

Not only will the IC UPDATES update your IC Master Catalog they will provide valuable IC application and selection information in every issue.

SPRING, SUMMER and FALL

and remember our toll free number for up-to-date product information: **800 443-0100 (EXT.) 518**



Street-wise designers: use the ultimate in speed and power control.

New Harris 82C85 Static Clock Controller operates in four low-power modes.

The new Harris 82C85 static CMOS clock controller/generator dramatically reduces power consumption in static CMOS systems by giving you four distinct operating modes.

- **Full Speed for top performance.**
- **Slow mode for low power and continuous operation.**
- **Stop Clock for low power and instant restart.**
- **Stop Oscillator for minimum power standby operation.**

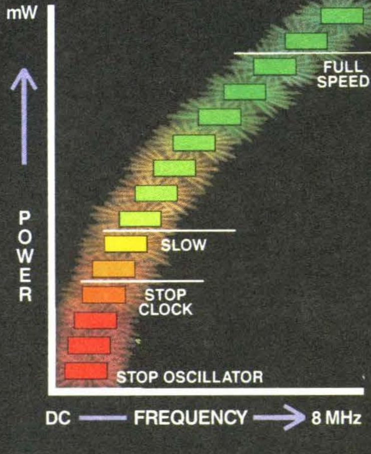
Designed specifically for 80C86 and 80C88-based systems, the 82C85 responds to a software HALT command, stopping all system clocks automatically. The 82C85 can also be controlled by a flexible independent START and STOP control structure.

With a full DC-8MHz operating frequency range, the 82C85 allows you to control your system power and performance, tailoring them to your exact requirements.

Stop...With **no** loss of data! Accelerate...With **no** delay!

It's the control you've been waiting for — for your portable instrumentation, industrial process control or military guidance systems. In fact, it's easy to design into any CMOS system that needs extremely low operating power.

The new Harris 82C85 static CMOS clock controller/generator — the next generation of system control from the world's leader in 16-bit CMOS microprocessors.



For full details, call 1-800-4 HARRIS, Ext. 1285 (in Canada, 1-800-344-2444, Ext. 1285) or write:

8-bit

MC68020-Still the leader.

20 MHz performance, architecture and availability make it the preferred 32-bit system solution.

Recent system-performance measurements painstakingly carried out by current users on production hardware are documented in the latest Motorola benchmark brochure, BR322.

Performance superiority of the MC68020 over the closest challengers is clearly established. No 32-bit announced in 1985 will change that, or these facts.

No other Floating Point Coprocessor offers the performance, broad-based functionality and flexibility of Motorola's MC68881.

No other Paged Memory Management Unit gives the power and flexibility to the operating system of Motorola's MC68851.

And, Motorola's MC68020, MC68881 and MC68851 are all available now.

Of course, the decision is yours. Do you take the clear performance leader that's available now and go to market with systems that outperform their competition? Or, do you wait for something else, only to find it's too little, too late.

The highest-performance 32-bit system solution—MC68020.

In your drive for product leadership, reliance on an outdated architecture or failure to design in the highest performance can be fatal.

Motorola's MC68020 and powerful peripherals are the only 32-bit solution that provides both the architecture and system performance you need to stay ahead. The performance of all three 32-bit system-solution devices is maximized by advanced Motorola HCMOS manufacturing, which gives them reduced power dissipation for more reliable operation and greater chip densities for higher frequencies. Future operating frequencies of over 20 MHz are coming, and 12.5, 16.67 and 20 MHz operation is the present MC68020 norm.

Designed in by leaders around the world.

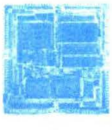
Here are just a few of the companies setting the pace around the world with MC68020-based products:

Apollo	CAE Workstation
Cal Tech	Hypercube Supercomputer
Convergent Technology	Business Supermicro
Charles River Data	Business Supermicro
Hewlett Packard	CAD/Inst. Workstn.
Honeywell	Multi-tasking Computer
Mitsubishi	Numerical Control/ Robotics
NCR	Multi-user Bus. Syst.
Sanyo	Graphics Workstation
Siemens	Telephone Switching System
Sun Microsystems	Tech. Prof. Workstation
Tektronix	A I System

This dozen and many others already have systems introduced and in production. Over 500 more are now working to design in the MC68020. Don't be outperformed. Keep up. Start now with the Motorola high-performance 32-bit system solution.

Powerful coprocessor system elements.

The MC68881 Floating Point Coprocessor (FPCP) and MC68851 Paged Memory Management Unit (PMMU) supplement the MC68020 in the most powerful solution for high-performance 32-bit systems.



The PMMU efficiently supports a demand-paged virtual memory environment for multi-user and multitasking systems. It has an on-chip translation cache, and performs logical-to-physical address translation. The MC68851 also has unique features such as variable page sizes, optional tables for DMA support, and breakpoints and support for extended logical or physical caches, making it the best choice for systems requiring memory management.

Motorola's MC68881 is the only FPCP that meets and exceeds the IEEE floating point standard. It performs a full selection of transcendental and non-transcendental functions —root values, trig functions, exponentials, logs and more—in addition to the basic add, subtract, multiply and divide. No external software or extra ROM and RAM are needed. All functions are in hardware.

MC68881 performance is unmatched. Customers have reported up to 1000K Whetstones performance, more than 4x that of the closest competition.

User-code compatibility stretches your software investment.

Your system can incorporate the performance improvements of the MC68020 without massive code rewrites when its roots are in the M68000 Family, and its 100% upward user-compatibility. And, dynamic bus sizing even allows you to plug the MC68020 into existing 8- and 16-bit systems for upgraded performance and quick-turn designs. Of course, board level products inherit the compatibility features of the devices.

Now Motorola supplies the highest performance available for VMEbus, the world's most widely used 8-/16-/32-bit bus architecture, with the MC68020-based VME130 single-board computer.
